Three Phase Rectifier Bridge Module (Low Profile of 17mm height)

DF200AC series

IF(AV) = 200A, VRRM = 800 - 1800V

SanRex Three Phase Rectifier Bridge Module DF200AC series is designed for applications requiring low profile converter-inverter circuit designs. Thanks to the 17mm flat case height design, the DF200AC series can be connected with IGBT or MOSFET modules at the same 17mm case height. This advantage typically reduces the needed parts and manufacturing cost. It also enables level parallel connections for larger capacity, contributes reducing stray inductance, improving high efficiency and reliability.
